

① Find maximum value in an array.

* Source:-

```
#include <stdio.h>
int main() {
    int n, i, max;
    printf("Enter the number of elements: ");
    scanf("%d", &n);
    int arr[n];
    printf("Enter %d elements: \n", n);
    for (i = 0; i < n; i++) {
        scanf("%d", &arr[i]);
    }
    max = arr[0];
    for (i = 1; i < n; i++) {
        if (arr[i] > max) {
            max = arr[i];
        }
    }
    printf("Maximum value in the array = %d\n", max);
    return 0;
}
```

* Input:-

Enter the number of elements: 5

Enter 5 elements:

12 45 23 89 34

* Output:-

Maximum value in the array = 89

② Calculate the sum of array elements

* Source:-

```
#include <stdio.h>
int main() {
    int n, i, sum = 0;
    printf("Enter the number of elements: ");
    scanf("%d", &n);
    int arr[n];
    printf("Enter %d elements: \n", n);
    for (i = 0; i < n; i++) {
        scanf("%d", &arr[i]);
    }
    printf("Sum of array elements = %d \n", sum);
    return 0;
}
```

* Input:

Enter the number of elements: 5
Enter 5 elements: 10 20 30 40 50

* Output:-

Reversed array: 50 40 30 20 10
sum of array elements = 150

③ Reverse an array in c.

* Source

```
#include <stdio.h>
int main() {
    int n, i;
    printf("Enter the number of elements: ");
    scanf("%d", &n);
    int arr[n];
    printf("Enter %d elements: \n", n);
    for (i = 0; i < n; i++) {
        scanf("%d", &arr[i]);
    }
}
```

3

```
printf("Reversed array: \n");  
for (i = n - 1; i >= 0; i--) {  
    printf("%d", arr[i]);  
}  
printf("\n");  
return 0;
```

3

* Input: -

Enter the number of elements: 5

Enter 5 elements: 10 20 30 40 50

* Output: -

Reversed array: 50 40 30 20 10
